Corona Virus Pandemic (Covid-19)

For health information and advice, call the 24hr hotline at 536-4500. Learn about the government's response to the virus at gisbarbados.gov.bb.

[Overview](#)[About Accident and Emergency](#)[Visit Patient](#)

Accident & Emergency Overview

The Accident and Emergency Department created in 2020 is committed to the provision of quality, timely emergency care, to acutely sick and injured persons; both citizens and visitors alike. Pioneered by Dr Michael Holder and Dr Vanessa Harold, has opened with a team of initially 12 doctors and 16 consultants and 8 nurses. As the busiest department in the hospital, the A&E Department attends to approximately 15,000 patients annually.

[A&E - Guest Overview](#)

Our physicians and nurses are here to help you and your relatives during your visit to the Emergency Department. The following information is what you should know before and during a visit to the Accident & Emergency Department:

- Be sure to always have your identification cards, list of current medications (including dosages and schedules) and if you are bringing a child, be sure to have the immunization card (Green Book)
- Ask our staff if you have any questions or concerns about your relative's treatment, procedures and medications.

Registration

Patients will be instructed to complete a registration upon arrival. Patients will need to provide their full name, date of birth, national registration number or passport number, gender and the reason for visit. Patients will then be assessed by the triage nurse. If the patient's treatment is urgent, they will be taken to the treatment area. If the patient is stable, they will finish the registration process and be taken to the treatment area when there is a room available. The staff of the Emergency Department is committed to providing the most accurate and efficient treatment to the patients it serves.

Waiting Areas

The waiting rooms are provided for the comfort of patients and their relatives or friends. The outside waiting area is open 24 hours a day and includes television-viewing areas, and vending machines just outside the area. It also has a stand alone phone charging ports for your convenience. Patients can expect to wait until their tests are completed and the results are back. The Emergency Department is often very busy with many patients requiring immediate or urgent treatment.

In need of assistance:

[Click Here](#)

Staying Safe in Hospital

You also have a duty to treat the hospital, staff, and other patients with respect and provide healthcare staff with information about your health.

- Respectful
- Safe
- Responsive
- Looked After

Your Stay

During your stay, you will be cared for by different healthcare staff at different times, who will keep each other up-to-date about your care and treatment. You and your carer or family members should be involved in this process so you'll know what is going on with your care and treatment. If at any time you don't understand what is being said to you, ask the staff caring

Meal Times

Meal times are as follows:

- Breakfast: 7.30am-9.30am
- Mid-morning coffee: 10.15am-11am
- Lunch: noon-1pm
- Tea: 3-3.30pm
- Supper: 5.45pm-7pm
- An evening drink is served after visiting time.

Patient Information Page - This page gives the patient information about their stay at the hospital and also event buttons for assistance.

Medical Procedures

Before starting any medical procedure, medical staff will make a final check to confirm:

- * your full name and date of birth
- * Any allergies or bad reactions you may have to any medicines, food, or other
- *The procedure you are having
- *The part of your body where the procedure is being performed (if applicable)
- * Your consent form is complete and correct.

Prevent yourself from falling

Falls can happen easily when you are unwell, taking new medicines, and in unfamiliar places.

Healthcare staff will discuss your risk of falling and put actions in place to reduce your risk, such as:

- wear suitable clothing and non-slip footwear with good support
- get up slowly after sitting or lying down
- be aware that you may need more assistance than usual to move around
- call staff for help if you need help moving, if you are feeling unwell, dizzy, or there are hazards in your way
- have the call bell within reach and use it to call for help or use the buttons on this page
- get to know your hospital room, furniture, and bathroom location
- use your glasses, walking and hearing aids and keep them within easy reach
- be extra careful in wet areas.
- If you do have a fall: don't try to get up by yourself always call for help from staff.

Your medicines

It's important you keep track of your medicines – taking the right medicine at the right time will help you get well. Using medicines in the wrong way may cause unwanted side effects.

Medicines may be:

- tablets, capsules or liquids, patches, creams and ointments
- drops and sprays for eyes, nose, ears and mouth
- inhalers and puffers
- injections or implants
- pessaries or suppositories
- vitamins and dietary supplements
- natural or herbal remedies.

Treatment, transfer or discharge

In the event, that you are not addmitted to a ward. Please note

The waiting time target for patients in A&E is currently set to 4 hours from arrival to admission, transfer or discharge. However, not all hospitals have urgent care centres associated, which means people with minor injuries may have a longer wait until they are seen. In some cases you may be sent home and asked to arrange for a GP referral or you may be given a prescription and sent home. Either way, the hospital will inform your GP that you have been to A&E. If your situation is more complicated, you may be seen by an A&E doctor or referred to a specialist unit. For example, this could happen for eye problems, strokes or emergency gynaecology.

#	Question	Answer	Action
1	When will I be able to leave the hospital ?	The length of your stay is based on your progress and your treatment. Please check with your doctor.	Edit Delete
2	Can I be fast Tracked ?	Patients with a minor injury may be eligible to be seen in our Minor Cases Unit or referred to Fast Track at the Michael Browne Polyclinic	Edit Delete
3	Who will I see in the A&E department?	Everyone is assessed by a medical professional on arrival who will assess how serious your condition is and whether you need to be seen in the department on the day of arrival. Depending on your needs, you will be treated by either an emergency nurse practitioner or one of our A&E doctors.	Edit Delete
4	How can my family and friends call me?	The telephone in your room cannot be dialed directly from outside the hospital. All calls must come through the hospital switchboard, 246-000-0000. Your family may call you at any time on most nursing units.	Edit Delete
5	What do I do if I have questions about my bill?	You can call Patient Business Services, extension 4910, while you are in the hospital or at (831) 625-4922 after you go home.	Edit Delete
6	Are cell phones allowed in the hospital?	No you cannot	Edit Delete
7	When can I leave the hospital	Neverrr	Edit Delete
